STATEMENT OF FACTS UNDER 37 C.F.R. §1.47(a)

MS Missing Parts
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This Statement is made as to the facts that are relied upon to establish the diligent effort made to secure the execution of the Declaration by the non-signing inventor for the above-identified application. This Statement is made by the available person having first-hand knowledge of the facts relied upon herein.

1. The non-signing inventor, Mauricio J. Serrano, was formerly employed by Intel Corporation (“Intel”), the Assignee of the above-referenced application.

2. While an employee of Intel, Mauricio J. Serrano jointly invented the subject matter of the above-referenced application.

3. On May 15, 2003, Mauricio J. Serrano submitted an invention disclosure form to in-house patent counsel for Intel listing himself, along with Sreenivas Subramoney, Richard Hudson and Ali-Reza Adl-Tabatabai as joint inventors of the subject matter of the above-referenced application. (See Exhibit A, with redacted pages).

4. On December 23, 2003 and May 20, 2004, a copy of a Declaration and an Assignment were forwarded to Richard Hudson and Sreenivas Subramoney at Intel. (See Exhibit B).

5. On July 7, 2004, joint inventor Richard Hudson executed both the Declaration and Assignment forwarded on May 20, 2004. (See Exhibits C and D).

6. On May 25, 2004, joint inventor Sreenivas Subramoney executed both the Declaration and Assignment forwarded on May 20, 2004. (See Exhibits C and D).

7. On July 7, 2004, joint inventor Ali-Reza Adl-Tabatabai executed both the Declaration and Assignment forwarded on May 20, 2004. (See Exhibits C and D)

8. After learning that Mr. Serrano was no longer at his last listed address, 1082 Delno Street, San Jose California, 95126, and after obtaining his current email address, on August 2, 2004 and again on August 20, 2004, applicants' representative sent an email requesting that Mr. Serrano contact him. Mr. Serrano did not respond.

9. Applicants' representative called Mr. Serrano on September 2, 2004 to request his execution of the Declaration and Assignment.

10. On September 2, 2004, the applicants' representative forwarded the Declaration and Assignment to Mauricio Serrano at his current e-mail address. (See Exhibit E).

11. The applicants' representative called Mr. Serrano again today (September 3, 2004) to request his execution of the Declaration and Assignment. Mr. Serrano refused to discuss the matter and did not sign the Declaration and Assignment forwarded to him.

12. As of the undersigned date, Mr. Serrano has not signed the Declaration and Assignment.

13. On December 31, 2003, the above-referenced application was filed with the U.S. Patent and Trademark Office under Serial No. 10/749,425 listing Sreenivas Subramoney, Richard Hudson, Mauricio Serrano and Ali-Reza Adl-Tabatabai as joint inventors.

14. On May 3, 2004, the U.S. Patent and Trademark Office issued a Notice to File Missing Parts of Non-Provisional Application indicating that an inventor declaration had not yet been submitted. (See Exhibit F).

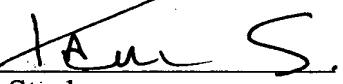

15. I believe a diligent effort has been made to obtain Mr. Serrano's signature on a declaration for the patent application.

16. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Accordingly, the undersigned is filing this Petition and signing on behalf of the Assignee to protect the interest of the parties and avoid irreparable damage thereto. Pursuant to M.P.E.P. § 409.03(b), second paragraph, as patent counsel for the Assignee, the undersigned is hereby authorized to sign on behalf of the Assignee and accordingly does so with this Petition.

Can you two coordinate the signing of the attached assignment and declaration? I will file the case early next week, but can file it without these signed documents, as the application has already been approved. The signed documents may be filed after the application is filed.

If you have any questions, please contact me.

Thank you again for your guidance and help.

Happy Holidays,

Sree,

Did I send you a declaration and assignment for execution by the inventors? If so, I do not recall receiving the signed documents. We have received a notice from the patent office indicating that the documents are due and I would like to get them filed within the next few weeks, if possible.

Please let me know if you would like another electronic copy of the declaration and assignment, or if I did not send you copies in the first instance.

I hope all is well on your end.

Warmest regards,

Paul

APPLICABLE RULES AND STATUTES

37 CFR 1.56. DUTY OF DISCLOSURE - INFORMATION MATERIAL TO PATENTABILITY (Applicable Portion)

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentability defines, to make sure that any material information contained therein is disclosed to the Office.

Information relating to the following factual situations enumerated in 35 USC 102 and 103 may be considered material under 37 CFR 1.56(a).

35 U.S.C. 102. CONDITIONS FOR PATENTABILITY: NOVELTY AND LOSS OF RIGHT TO PATENT

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for patent, or
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States, or
- (c) he has abandoned the invention, or
- (d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States, or
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraph (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent, or
- (f) he did not himself invent the subject matter sought to be patented, or
- (g) before the applicant's invention thereof the invention was made in this country by another who had not abandoned, suppressed, or concealed it. In determining priority of invention there shall be considered not only the respective dates of conception and reduction to practice of the invention, but also the reasonable diligence of one who was first to conceive and last to reduce to practice, from a time prior to conception by the other.

35 U.S.C. 103. CONDITIONS FOR PATENTABILITY; NON-OBVIOUS SUBJECT MATTER (Applicable Portion)

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

35 U.S.C. 112. SPECIFICATION (Applicable Portion)

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.
